88-10	.2	4.06	.43	.16	
88-12	.5	1.63	.47	.44	

In the drilling and exploration crosscuts, parallel and gold bearing structures were also intersected. In addition, drilling from the No.3 crosscut near the Main drift intersected 3 parallel sulphide bearing structures containing gold values. The indication is that potential gold bearing zones extend to the southeast. A second stage of metallurgical testing is in progress in addition to a final reserve calculation. (SEE also GCNL No.142, p.1, 25Jul88 and map in No.146, 29Jul88).

### X-CAL RESOURCES LTD. (XCL-T)

SNOWBIRD DRILLING STARTED - Shawn Kennedy, president of X-Cal Resources Ltd., reports that the winter diamond drilling program on its Snowbird property near Fort St. James, B.C., started January 20, 1989. Early indications are the program is extending the zone of mineralization to depth and along strike. Meaningfull assay results are forecast to be available in early March. SEE MAP OVERLEAF PAGE 1, AND GCNL NO. 6, Jan 10,1989 for program details.)
