

TAYWIN RESOURCES LTD. (TYN-V)

ADDITIONAL ASSAYS REPORTED - J. Donald Graham, P.Eng.,
president, has reported
Taywin Resources Ltd. is continuing exploration on the
Merry Widow property near Port McNeill, Vancouver Island,
B.C. Assays are now available from chip sampling done

• NO.132 (JULY 11, 1989) • GEORGE CROSS NEWS

on the sulphide-rich Marten showing. This showing is
200 metres south of the Merry Widow pit. Grab samples
were taken in the South Pit area between the Merry Widow
pit and the Marten showing.

The results demonstrate gold values continue to the
south from the Merry Widow pit.

MARTEN	WIDTH	GOLD	COPPER	COBALT	
<u>OUTCROP</u>	<u>FEET</u>	<u>OZ/T</u>	<u>%</u>	<u>%</u>	
No.1	10	0.18	0.45	0.03	'Grab samples in the

No.3	10	.09	.28	.12	'values in the 0.4 to
					'0.2 oz.gold/t range.
					'Grab samples from the
					'Raven zone, immediately
					'north of the Merry
					'Widow pit have returned values in the 0.3 to 0.4
					oz.gold/t range.

The recent drilling intersected sulphides in seven
holes. Assays are awaited. (SEE GCNL NO.121, P.3,
23Jun89 for previous results).
