**INEL RESOURCES LTD. (ILE-V)**

**EXPLORATION STARTED** - Inel Resources Ltd. has started exploration on its 50% owned Inel property, Iskut River, B.C. The company can earn a 100% interest through expenditures of an additional \$2,400,000 by 1992. Funding is from a recent \$1,125,000 private placement with Banque Hunziker of Geneva, Switzerland.

The 1988 program involved 1,800 feet of underground drifting; 14,000 ft. of diamond drilling from underground; 6600 feet from surface and extensive surface prospecting. The program discovered a number of high grade gold intercepts within the Discovery zone, a system of easterly trending veins. Among the more significant results:

A new surface discovery, the Northwest Ridge zone, assayed 1.582 oz. gold/t over 1.3 feet and 1.22 oz. gold/t over 1.0 feet. The 1989 program budgeted at \$1,000,000 will consist of: extension of the adit 300 feet to the Main sulphide zone; 6000 feet of underground drilling and 8000 feet of surface drilling.
