

DOROMIN RESOURCES LTD. (DOI-V)

PROGRESS REPORT AWAITED - Dornin Resources Ltd. is awaiting a geological report on a mapping program on the Climodoro property, Queen Charlotte Islands, B.C. where work located a new copper-rich sulphides lense which runs parallel with the gold-rich barite zone (main showing).

Sampling result ranged from 1.22-1.305 oz.gold/ton, 39.7-48.7 oz.silver/t, 4.5% lead in the gold/rich barite zone. Grab samples of massive sulphides returned results ranging from 0.030-0.549 oz.gold/t, 0.20-38.41 oz. silver/t, 0.122-2.36% copper, 0.04-4.52% lead and 0.34-5.20% zinc. Various major mining corporations have visited the property.
