INTERNATIONAL VESTOR RESOURCES LTD. (IVS-V)

QUINTERRA RESOURCES INC. (QUA-V)

PACIFIC CASSIAR LIMITED (PFL-T)

DRILLING UNDERWAY AT CHU CHUA - John A. Greig, president
of International Vestor

Resources reported a 5,000 ft. diamond drilling program
is underway on the Chu Chua property, 80 km north of
Kamloops, B.C. The program is funded by Minnova Inc.,
who may earn a 50% interest in the property. Vestor
Resources, Quinterra Resources Inc. and Pacific Cassiar
Limited own the property equally.

The Chu Chua volcanogenic massive sulphide deposit
has a drill indicated reserve of about 2,800,000 tons
grading 2% copper with zinc, silver, gold and cobalt
values. The deposit extensions are open in both
directions on strike which will be drill tested now.

In 1988, drilling within the top 250 feet of the
deposit revealed a high grade zone which was calculated
as 785,000 tons of 3.1% copper or 460,000 tons of 4.07%

copper, all of which can be open pit mined.

An open pit reserve and open pit design will be
prepared on completion of the drilling. Preliminary
metallurgical testings is in progress. A 3.1% copper
grade at current producer prices is worth about \$85
Canadian per ton. (SEE also p.2, this issue, for other
news on Int'l Vestor).
