**PACIFIC SENTINEL GOLD CORP. (PSG-V)**

**CLAIMS WON IN LOTTERY DRAW-** Douglas B. Forster, vice president reported that Pacific Sentinel Gold Corp. has been awarded a 100% interest in 7 mineral claims, 6990 acres, at Atlin Lake, 30 miles SW of Atlin, B.C. by the B.C. Government. As a result of 15 applications having been submitted for the same claims, a lottery style draw was used to award the claims, with Pacific Sentinel winning.

Moranda Exploration Company owns a 620 acre claim that is wholly enclosed with Pacific Sentinel's property, which covers the Laverdiere prospect. A number of adits and tunnels have been excavated within the sulphide zones on the Laverdiere prospect with reported assays of up to 0.65% copper over 165 feet and 1.58% copper over 40 feet, with values in silver and gold also reported. Aeromagnetic and assessment report data suggest that the Laverdiere massive sulphide horizon extends both north and south onto Pacific Sentinel's property. In addition, quartz veins up to 2 ft. wide are reported in the northern part of the property and have returned assays up to 1.58 oz. gold/t and 7 oz. silver/t.
