NOVEMBER 10, 1989

WESTERN CANADIA

MACNEILL INTERNATIONAL INDUSTRIES INC. (MCE-V)

HOLE NO.	WIDTH FEET	GOLD OZ/T	SPOKANE PROPERTY ASSAY RESULTS
89-131	21	0.262	Frederick Hilton, director, reports MacNeill International
incl.	6.6	.687	Industries inc. has received
89-105	50	.22	further assay results from the
88-8	26.65	.35	Spokane gold property 40 km NW of

Lillooet, B. C. MacNeill has a 50% interest in the property with JULIA RESOURCES CORP. (JUR-V) and ENEXCO INDUSTRIES LTD. (ENX-V) each owning 25%. Drill hole 131-89 is located about 250 feet east of hole 89-105 and about 650 feet west of hole 88-8, included sections grading 0.831 oz.gold/ton. Drill hole 131-89 determined the continuity of the vein for more than 900 feet. Between 248 and 339 feet drill hole 135-89 intersected quartz containing visible sulphides. It was drilled to intersect hole 131-89 to determine the dip of the vein. Assays are pending.

Drilling on the 100%-owned Cub 200 claim located 3,000 meters SE of the Spokane property continues. The highly silicified granodiorite contains visible sulphides and has been traced for over 2,000 feet on surface with widths up to 250 feet.

MacNeill's interest in the Spokane property is held by subsidiary Spokane Minerals Ltd. It was recently reported that 49% of MacNeill's shareholdings in Spokane

Minerals will be distributed to shareholders of record Oct.16/89, subject to shareholder, regulatory and Supreme Court of B.C. approval. An extra-ordinary general meeting will be held 5Dec89. The registered holder of the Spokane property refused to accept his annual advance royalty payment and is claiming the right to terminate the option agreement. MacNeill has begun an action to protect its rights and has obtained an injunction against the optionor. MacNeill's solicitors say there is no merit in the optionor's claim.
