OTTO PROJECT ASSAYS - James H. Simpson, director of Roper Resources Inc. has begun diamond drilling on the Otto project five miles north of Likely, B.C. The drill target is a large quartz vein system up to 200 feet wide that has open pit potential. The structure has been mapped for over 1,000 feet in length. Past sampling results are summarized in the above table. The drill program is being funded by Priority Ventures Inc., which can earn a 7.5% interest by issuing 50,000 shares to Roper, spending \$70,000 on exploration and making payments totalling \$26,000.
