<u>AMERICAN FIBRE CORPORATION (AFB-V)</u>				
<u>SILVER BUTTE RESOURCES INC. (SBU-V)</u>				
HOLE NO.	INTERVAL FEET	LENGTH FEET	GOLD OZ/T	MORE SIB ASSAYS
89-5	187.0 - 190.3	3.3	0.055	Lou Dillman, president, American Fibre Corp, reports more assays from the Sib 1-16 claims adjoining the Cal-pine/Stikine No. 21 Zone discovery at Eskay Creek, 50 km. NW of Stewart, B.C.
89-6	26.25 - 39.4	13.2	.062	
	160.7 - 164.0	3.3	.033	
	180.5 - 184.0	3.5	.074	
89-7	164.0 - 173.9	9.9	.092	
89-8	42.6 - 45.9	3.3	.07	
	82.0 - 85.3	3.3	.03	
	196.8 - 200.0	3.2	.14	
	308.3 - 311.6	3.3	.034	
89-9	No significant results			American Fibre has an option to earn a 50% interest from Silver Butte Res. Holes 89-5 though 89-11 tested the central zone where trenches returned high gold values.
89-10	173.3 - 176.5	3.2	.031	
	259.2 - 262.5	3.3	.123	
89-11	344.5 - 347.8	3.3	.038	
	374.0 - 377.3	3.3	.036	
89-12	88.6 - 143.6	55.0	.044	
89-13	121.4 - 124.7	3.3	.033	
	314.9 - 318.2	3.3	.067	

Holes 89-12 and 89-13 tested the surface extension of the <u>1100 zone</u> where trenching was encouraging. Just prior to winter shut-down, two holes were collared to test an IP anomaly south of the Central zone. Assays are awaited. Geophysics and drilling will resume in the spring.
