Lillooet, B.C. The property is held 25% by Enexo International, 25% by Julie Resources and 50% by MacNeill Industrial Inc.

In conjunction with the drilling, a program of trenching to expose quartz veins has been undertaken across an area which extends for approximately 800 meters. Systematic sampling is being carried out. Assay of grab samples from trenches are reporting values to 1.93 oz. gold/t and 4.4% copper from 45 samples assayed to date.
