-----'gold property located
on the west side of Phillips Arm, two km SW of Fanny Bay,
55 km north of Campbell River, B.C. Samples in the table
were taken from a vein structure parallel to a series of
veins previously explored. Strike of the sampled vein
has an inferred length of 85 meters with a width of about
4 meters. The exploration program is still underway with
further trenching, mapping and sampling being carried out
on the newly-discovered vein structure.

Aramis can earn a 49% interest from New Signet,
subject to a 10% net profits interest, by making staged
payments totalling \$100,000 and spending \$600,000 on
exploration. (SEE GCNL No. 201, FOR MORE DETAILS)
