GLOBAL-PACIFIC MINERALS INC. (GPJ-V)

GOLD - COPPER PROJECT NEAR- Global-Pacific Minerals
LIKELY TO BE FURTHER EXPLORED Inc. plans further exploration including VLF-EM, Max-Min II surveys and diamond drilling, on the Bullion Lode property 3 km SE of the QPX Minerals/Placer Dome QR Deposit and 7 km north of the Imperial Metals/Corona Corp. Mt. Polley Deposit, near Likely, B.C.

An area location map is currently being prepared.

Global-Pacific acquired the Bullion Lode Property in 1984. In 1985 Dome Exploration (Canada) Limited optioned the property and carried out soil sampling, magnetic, VLF-EM and Max-Min II surveys, some geological mapping and 9,032 feet of diamond drilling. Numerous core samples contained anomalous amounts of gold with 31 samples ranging from 0.010 to 0.073 oz.gold/t. The geochemical sampling also indicated anomalous amounts of gold and copper. The property was returned to Global-Pacific after the merger of Dome and Placer Developments Ltd. in 1988.
