SEPTEMBER 19, 1989

DRAGON RESOURCES LTD. (DGN-V)

GREENSTONE RESOURCES LTD. (GRE-T,M;NASDAQ)

DRILLING BEGINS - Walter Clemens, director, reports that  
AT MCNEIL CREEK Dragoon Resources Ltd. has begun  
drilling on the McNeil Creek property  
in SE, B.C., owned 50/50 with Greenstone Resources Ltd.  
The main target is between the Lower and Middle Aldridge  
formations, the same horizon that hosts the Sullivan  
base metal mine 22 miles north of the property.

Drilling last year intercepted 106 ft. of bedded  
sediments containing pyrite, pyrrhotite, sphalerite and  
galena at the Lower-Middle Aldridge contact. Also  
intersected was high grade lead-zinc-silver in shear  
zones above the contact grading as high as 18% combined  
lead and zinc with 2.6 oz.silver/ton over 3.0 feet.  
Drill results are expected early in October.
