ALBAN EXPLORATIONS LTD. (ABN-V)

MT. MILLIGAN OPTION SIGNED—Hiro Ogata, president, reports Alban Explorations Ltd. has signed an agreement with NORANDA INC. to earn a 50% interest in the Mitzi property located 12 miles west of the Continental/BP Mt. Milligan deposit some 30 miles west of McKenzie, B.C., subject to regulatory approval.

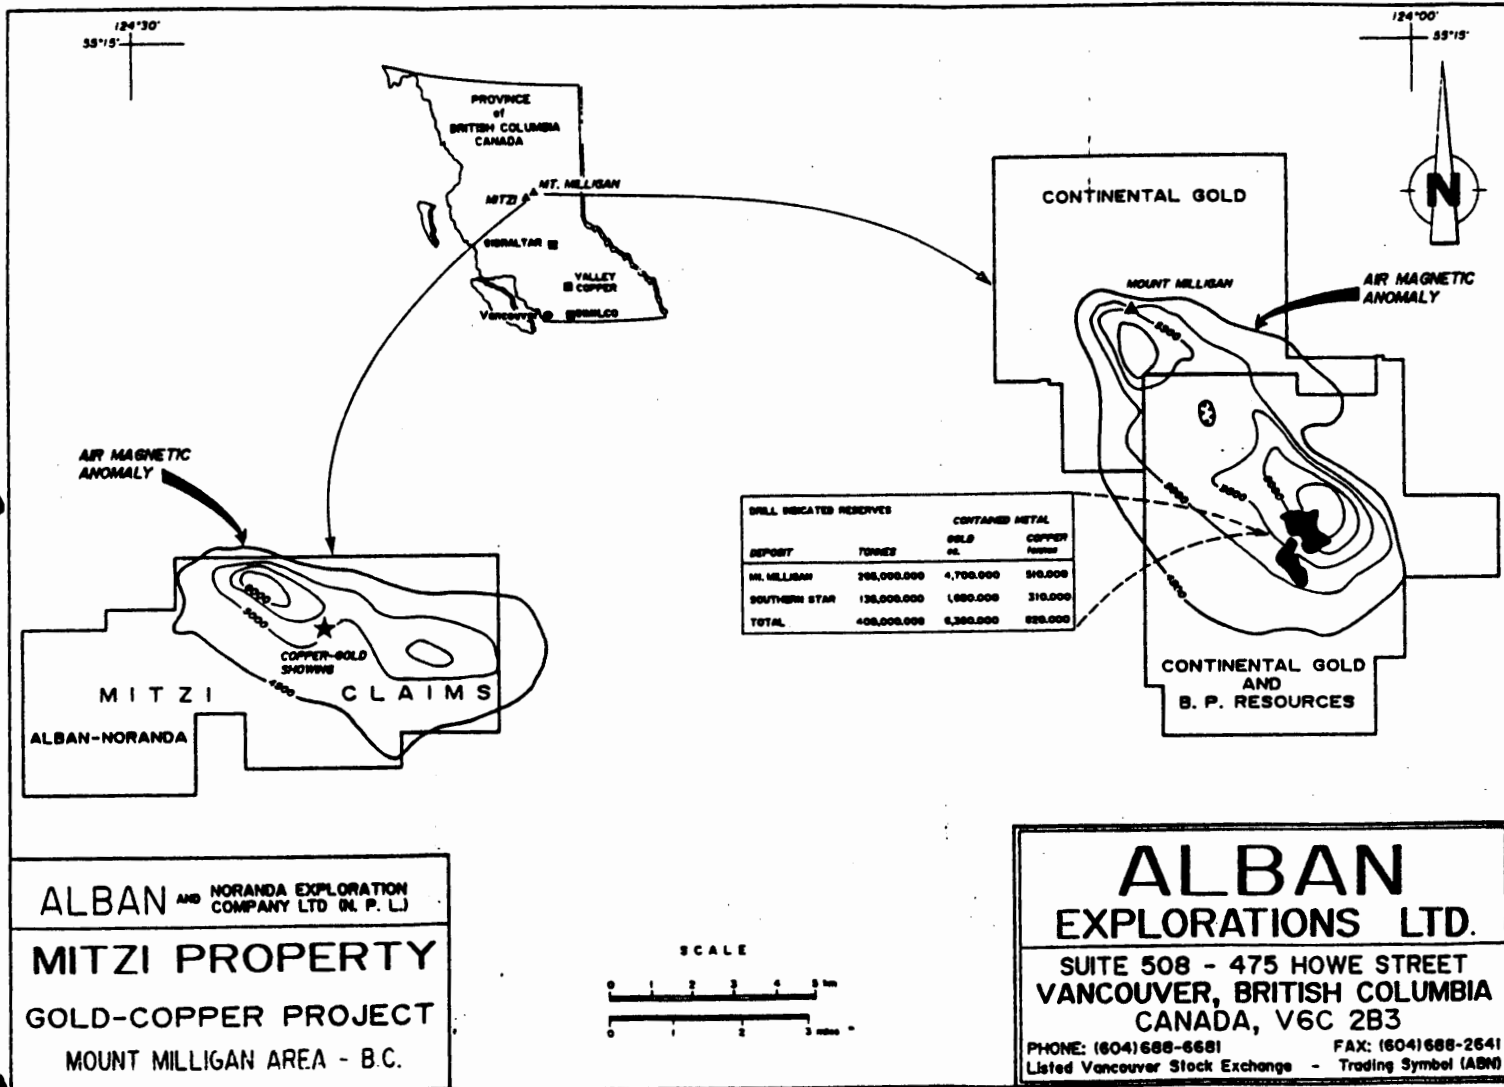

SEE CLAIM MAP OVERLEAF PAGE 1. Alban must spend \$1,000,000 on exploration by 31Dec92. Noranda will be operator. The aeromagnetic anomaly on the Mitzi property is similar to the one at Mt. Milligan and reconnaissance ground surveys carried out by Noranda over part of the property have shown: the geological setting to be similar to Mt. Milligan, a large area of anomalous copper in soil samples, a strong and broad induced polarization anomaly attributed to heavy sulphide mineralization and the presence of an old prospect pit from which a grab sample returned 0.144 oz.gold/ton and 1.59% copper.

Ground magnetometer and IP surveys, together with low-level airborne electro-magnetic surveys, will be carried out immediately for identifying suitable drill targets. (SEE GCML No.140, 20JU190, P.5 FOR OTHER DATA)
