VARITECH RESOURCES LTD. (VAR-V)

GOLD-COPPER MINERALIZATION - Byard H. MacLean, president CONFIRMED AT TAM PROPERTY of Major General Resources reports gold-copper mineralization has been confirmed by assaying old drill core on the Tam project, 130 km north of Mackenzie, B.C. Vari-tech Resources Ltd. may earn a 50% interest by payment of \$60,000 cash and 150,000 shares, spending \$600,000 on exploration and honoring a 2.5% net smelter return royalty to Major General.

The Tam property consists of 438 claim units covering similar geology as the Mt. Milligan porphyry copper-gold deposit of 6,000,000 oz. gold and 2 billion pounds of copper. More than 10,500 feet of drilling in the early 1970's outlined the Boundary deposit containing 7,700,000 tons grading 0.55% copper. Since little drill core was previously assayed for gold, certain drill cores were re-assayed, with the following significant values:

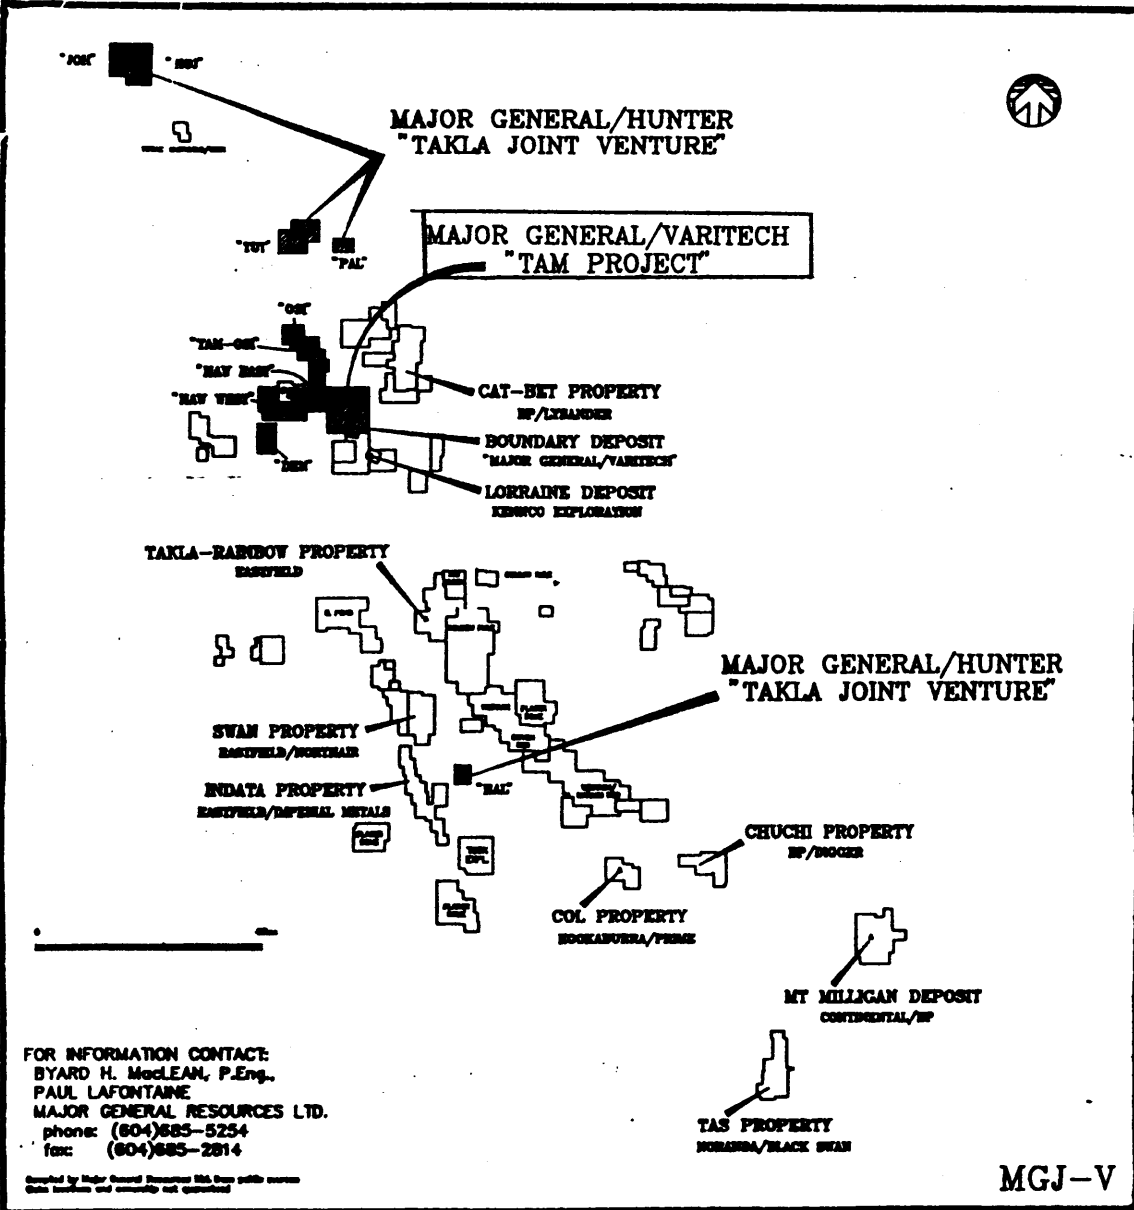

<u>DDH</u>	<u>INTERVAL</u>	<u>WIDTH</u>	<u>COPPER</u>	<u>GOLD</u>	<u>These re-assays</u>
	<u>METERS</u>	<u>METERS</u>	<u>%</u>	<u>G/T</u>	
73-1	2.3 - 11.4	9.1	1.89	0.05'	confirm the pres-
74-6	3.7 - 45.9	42.2	1.49	.17'	ence of high grade
	71.7 - 89.9	18.2	.63	.11'	copper with assoc-
	94.0 - 109.2	15.2	.45	.12'	iated gold values;
	134.0 - 143.0	9.0	1.96	.10'	significant silver
74-7	8.1 - 17.6	9.7	.37	Trace'	credits also occur
	28.0 - 72.3	44.3	.56	Trace'	in the mineralized
	121.0 - 176.5	55.5	.57	Trace'	zones.
74-9	144.9 - 179.0	34.1	.58	Trace'	Assaying of core

zones on the property returned higher grade gold intersections over narrow widths such as 0.96 g/t gold and 0.42% copper over 2.4 meters in Hole 72-5. Lower grade copper mineralization is common in other drill holes (such as 0.34% copper over 12.4 meters in Hole 72-1).

More re-assaying of old core is required to further evaluate the gold potential of this porphyry copper system. Phase I surface exploration on the claims should be completed by early September, at which time the data will be compiled in preparation for a Phase 2 drill program to start in late September. (SEE MAP OF PROPERTY HOLDINGS OVERLEAF P.3, AND GCNL No.161, 21Aug90, p.3 for previous information).
