WESTERN CANADIA

**TANTALUS RESOURCES LTD. (TTU-V)**

**FIELD CREW MOBILIZED - William Campbell, director,  
reports Tantalus Resources Ltd.**

has mobilized a field crew to the Treaty Creek project,  
located about 50 miles northwest of Stewart, B.C. and 10  
miles east of the 21 zone deposit of Prime/Stikine at  
Eskay Creek. Tantalus can earn a 51% interest from  
TEUTON RESOURCES CORP. (TUO-V) by paying \$300,000,  
issuing 200,000 shares and spending \$3,200,000.

Previous work by Teuton on the Konkin zone returned  
gold values of 0.220 oz/ton across 49.2 feet, 0.401 oz.  
gold/ton across 12.5 feet and 0.193 oz.gold/ton across  
16.4 feet. Limited drilling last year returned 0.137  
oz.gold/ton 13.4 feet including 0.249 oz.gold/ton over  
5.9 feet. In addition, several other showings were  
discovered. Surface sampling on the Southwest zone  
returned 0.311 oz.gold/ton over 8.2 feet.

The present work is focusing on the Gossan zone  
including line cutting and prospecting. Prospecting  
will also be completed on other areas of the property,  
particularly where Government geologists have indicated  
the favourable Mt. Dilworth formation exists.

Diamond drilling is planned for later this year to  
test targets generated by the current work program as  
well as to begin drill-testing of the Southwest zone and  
to follow-up on previous results from the Konkin and  
Goat Trail zones. (SEE GCNL No.141, 21Ju190, P.7 FOR
