WESTERN CANADA

CATHEDRAL GOLD CORP. (CAT-T)

At the Takla Rainbow project, 48 km west of Manson Creek, B.C., EASTFIELD RESOURCES LTD. (ETF-V) tested the potential for a large copper/gold deposit. Eastfield can earn a 50% interest from Cathedral by making expenditures and cash payments totalling \$3,000,000. Drilling in the western portion of the Red Grid, a copper/gold porphyry target, returned encouraging results, including 8.50 meters grading 0.59% copper. Cathedral previously outlined 320,000 tons grading 0.25 oz.gold/ton adjacent to the Red Grid. Prospecting of geochemical anomalies indicate other drill targets.
