(1) Excluding 1.76 meters grading 5.71% copper

(2) Excluding 2.00 meters grading 10.40% copper

SOUTH KEMESS DRILL RESULTS - James Kermeen, director,
reports St. Philips

Resources Inc. has received initial assay results from El Condor Resources Ltd. from a drilling program on the South Kemess project located in the southern Toodoggone area 200 miles north of Smithers, B.C. See map overleaf page 1. The property is 75%-owned by St. Philips and 25% by Stork Ventures Ltd. St. Philips has signed a letter of agreement with a principal of Stork to acquire all of Stork's outstanding shares, thereby consolidating 100% control of the property with St. Philips. El Condor, 60%, and its joint venture partner Kennco Explorations (Western) Ltd., 40%, have an option to earn a 50% interest in the South Kemess property by spending \$2,100,000 on exploration and cash payments of \$160,000.

The above three holes are part of a program of 12 or more holes to be drilled on a 100-meter grid pattern testing the extensions of the previously drilled area to the north, south and west. St. Philips does not have an interest in El Condor's North Kemess property. (SEE GCNL No.228, 26Nov90, P.3 FOR PREVIOUS INFORMATION)
