DECEMBER 13, 1990

George Cross

Reliable A

GOLD PARL RESOURCES LTD. (GPA-V)

PROGRAM COMPLETED - Robert McKenzie, president, reports Gold Parl Resources Ltd. has completed a VLF-EM and magnetometer survey, mapping and sampling on portions of the 65-unit KLU claims located about 140 km southwest of Fort Nelson, B.C. Gold Parl can earn a 100% interest. (SEE GCNL No.181, 19Sep90, P.5 FOR TERMS OF ACQUISITION) Selected grab samples have returned as high as 60% copper and 220 grams silver/tonne. Chip samples by company geologist returned 1.07% copper over 2.5 meters (zone 1); 5.36% copper over 1.0 meter (zone 2); 1.25% copper over 1.0 meter (zone 3) and 0.46% copper over 1.0 meter (zone 4). All widths are true thickness of the beds. A total of nine zones are known to exist on the property.

A two-phase program of trenching, sampling, mapping and induced polarization surveys followed by diamond drilling has been recommended for spring 1991.
