TRADER RESOURCE CORP. (TRR-T)

BIO-LEACHING TESTS PLANNED - Harvey W. Stark, director, reports Trader Resource Corp. and BIO MET TECHNOLOGY INC. (BTS-V) plan biological leaching tests on samples of sulphide ore from Trader's Banks Island, B.C. property where there are current reserves of 200,000 tonnes grading 0.45 oz. gold/ton. Biological leaching involves using live organisms which "eat" the sulphide crystals to free the gold values. Trader and CABRE EXPLORATION LTD. (CBE-T) have settled litigations out of court.
