REMIDA VENTURES INC. (RVT-V)

ANYOX SAMPLING COMPLETED - Remida Ventures Inc. reports an initial sampling program at the tailings pile located at the Hidden Creek mine at the former town of Anyox on the northwest coast of B.C., 80 miles north of Prince Rupert. Remida can earn a 50% interest in the tailings and dumps by paying \$250,000 and issuing 600,000 shares to Moss management Inc.

A vibracore drill was used to test below the weathered portion of the pile. Assays returned an average value of 1% copper with minor amounts of gold and silver. Initial estimates indicates a minimum 500,000 tons are present in the pile tested. Additional mine dumps and tailings are present, but were not tested due to weather conditions. (SEE GHCNL No.231, 29Nov90, P.3 FOR PREVIOUS INFORMATION)
