BRIGHTWORK RESOURCES INC. (BWI-V)

DIAMOND DRILLING CONTINUING ON OROFINO MT.
HIGH GRADE GOLD PROJECT, OKANAGAN VALLEY, B.C.

Eight holes of a planned 12 hole, 2,500 foot, diamond drill program have been completed by Brightwork Resources on the 100% optioned, 110 unit, Orofino Mt. gold property, 25 miles south of Penticton, B.C. The cores are being logged, split and sent for assay as each hole is completed. The assaying is being done by free metallic analysis, which takes about ten days per assay. First assay results are expected in early July.

Brightwork geologists have identified visible gold in quartz veins in cores from several of the holes.

Previous work on the claims included production, averaging close to 0.5 oz. gold per ton, starting in the 1890's and continuing at intervals to 1941.

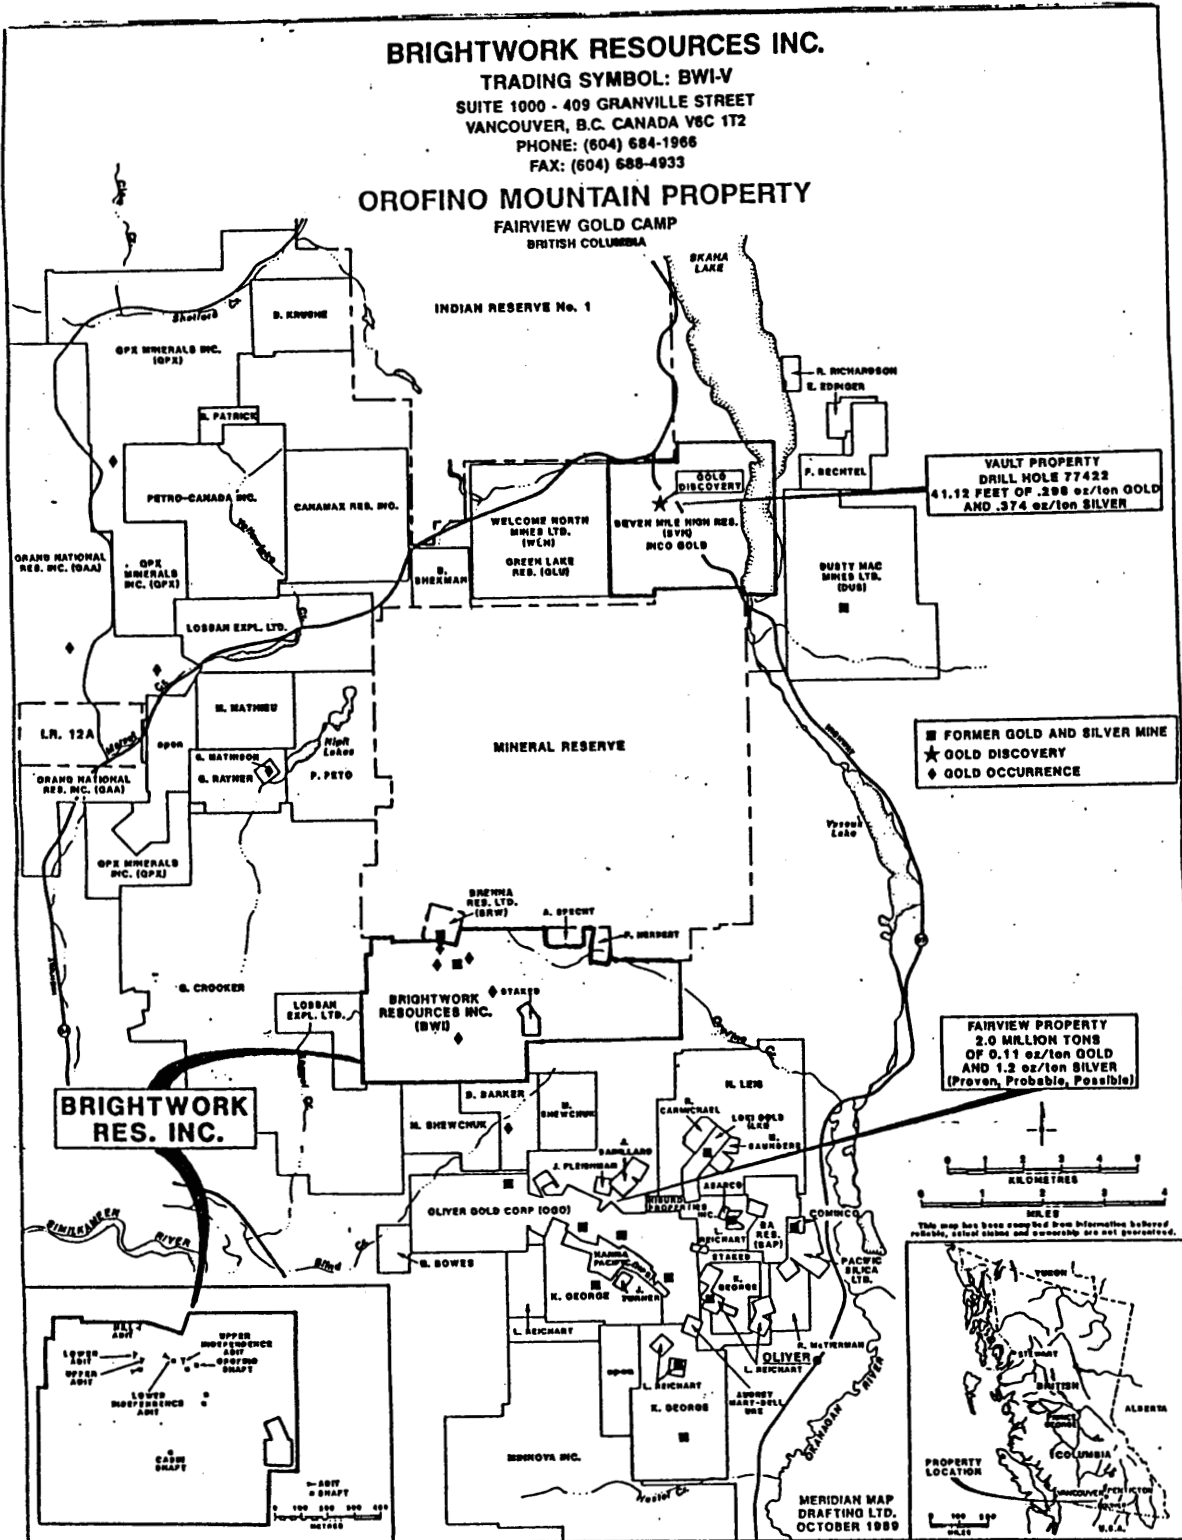

The Vault prospect 10 km north of Orofino Mt., is a recent discovery which Inco Gold has under option from Seven Mile High Resources. Inco Limited has proposed exploration budget for 1990 of over \$1,000,000. Other active companies in the area include Goldcliff Resources, Minnova and Oliver Gold Corporation.

Results will be announced as soon as meaningful assays have been received and evaluated by consultants.
