**CANDELA RESOURCES LTD. (CDD-V)**  
**KOKANEE EXPLORATIONS LTD. (KOO-V)**

**EXPLORATION PLANNED - Murray Pezim, chairman, reports Candela Resources Ltd. and Kokanee Explorations Ltd. are preparing for work on the Yahk project located 35 miles south of Cranbrook, B.C. The program is expected to begin by the end of June when funding arrangements will be completed. Candela can earn a 50% in the Yahk project from Kokanee by spending \$600,000 on exploration over two year, subject to regulatory approval.**

**The property is underlain by the Aldridge formation, which hosts the Sullivan mine at Kimberley and the St. Eugene mine near Moyie. Ten miles to the northwest, Kokanee reported promising results from the first hole drilled on the Star property which intersected 35 feet of sulphides, including a 2.5-foot interval with 15% sphalerite and 15% galena in a geological setting similar to the Yahk property. Kokanee is operator. (SEE GCNL No.72, 11Apr90, P.2 FOR PREVIOUS INFORMATION)**
