INTERNATIONAL CURATOR RESOURCES LTD. (IC-V)

OPTION SIGNED - Michael D. McInnis, president,
reports International Curator Resources
Ltd. signed an option agreement to earn Chevron Minerals
Ltd.'s 50% interest in the Agassiz-Weaver polymetallic
property located near Chilliwack, B.C. by incurring
certain exploration expenditures and making cash
payments by 31Dec95. The property is presently owned by
Curator and Chevron in a 50/50 joint venture. Curator
has an option until 31Dec97 to purchase Chevron's net
profits interest for \$1,500,000.

Subsequent to the agreement with Chevron, Curator
has granted Minnova, Inc. an option to earn a 50%
interest in the Agassiz-Weaver property by incurring
\$1,600,000 in work expenditures and making cash payments
totalling \$300,000 by 31Dec96. Upon completion of the
earn-in by Minnova, the property would be owned 50/50 by
Curator and Minnova, and Chevron would own a 10% net
profits interest. Minnova is planning a 1990 program of
geologic mapping, geophysical surveying and drilling.

The Agassiz-Weaver property comprises 12,000 acres
and is host to the Senec massive sulphide deposit. A
study by Wright Engineers estimates the deposit to
contain 1,660,500 tons grading 3.57% zinc, 0.63% copper,
0.024 oz.gold/ton and 1.2 oz.silver/ton. A number of
promising areas remain to be evaluated.

Mr. A. Farmer has resigned as director. (SEE GCNL
