ROCRAVEN RESOURCES LTD. (RVR-V)

KLAWLI RIVER EARN-IN - Robert Gayton, director, reports
Rocraven Resources Ltd. has signed an option agreement, subject to regulatory approval, to earn a 5% interest from **KOOKABURRA GOLD CORP.** (KOB-V) in the Klawli River project located about 55 miles north of Fort St. James, B.C. and 29 miles north of Continental Gold's Mt. Milligan deposit.

Rocraven must issue 100,000 shares and spend \$2,000,000 on exploration over three years. The property comprises the COL 1-7 and KAEL 2 claims which cover a geological setting similar to Mt. Milligan.

The claims are underlain by volcanic and sedimentary rocks that have been intruded by alkaline-felsic intrusives of the Hogen batholith. Previous explorers have outlined reserves in one zone of 2,000,000 tons at a weighted average grade of 0.6% copper. Limited re-sampling of old diamond drill core revealed gold mineralization that returned 2.17 parts per million (0.069 oz.gold/t) over 10 feet in a 50-foot interval grading 0.66% copper.

Kookaburra has identified several zones of coincident gold and copper soil geochemical and induced polarization anomalies that have not yet been drilled. Rocraven will be operator.
