DOROMIN RESOURCES LTD. (DOI-V)

DRILLING UNDERWAY - Marino Specogna, director, reports Doromin Resources Ltd. has begun drilling on its Cimadoro property located on Moresby Island, one of the Queen Charlotte Islands, off the coast of NW B.C. The drill program will concentrate in and around the three known gold and massive sulphide showings. The first main target is the Lower (Main) showing where surface samples have returned values of 1.3 oz.gold/ton, 48.1 oz.silver/ton, 21% lead, 15% zinc and 0.9% copper. This showing is exposed over 10 meters on surface with the three showings occurring over 90 meters. The company believes the 1989 drill holes were as much as 150-200 feet short of the mineralized structure and encountered another zone in the footwall unrelated to the surface exposed mineralized structure. (SEE GCNL No.103, 29May90, P.2 FOR PREVIOUS INFORMATION)
