RUBY SILVER PROJECT UNDERWAY - William Campbell,

secretary, Adrian

Resources Ltd. and 50/50 joint venture partner Thios Resources Inc. have mobilized a field crew to the Ruby Silver project 13 miles north of Stewart, B.C. (SEE GCNL No.95, 16May90, P.6 FOR TERMS OF ACQUISITION) The property comprises a number of reverted Crown grants and a 20-unit modified grid claim. The property, accessible by secondary roads, was worked in 1929 by Ruby Silver Copper Mines which drove three major adits, plus trenching and short adits. Tunnel No.1, located on the south side of Mosquito Creek, was driven into a four-foot wide mineralized zone contained within a 50-foot wide vein. A grab sample from this zone assayed 0.02 oz.gold/ton, 3.0 oz.silver/ton and 9.3% copper. This structure was intersected by three adits. Vein mineralization is reported to range from 0.02 to 0.32 oz.gold/ton, 0.45 to 3.36 oz.silver/ton and trace to 9.3% copper over widths of one to six feet. The 1990 exploration program, budgeted at \$150,000, will re-evaluate the existing underground workings and showings where accessible and complete prospecting, linecutting and mapping over the remainder of the property. (SEE GCNL No.111, 8Jun90, P.1 FOR OTHER PROJECT INFORMATION)
