WESTERN CANADA

ECSTALL MINING CORPORATION (EAM-V)

In September 1989, Ecstall acquired, for 400,000 treasury shares a 40% interest in the 4,400-acre Bronson-Pelican properties, subject to a 1% net smelter return royalty. Ecstall's interest is carried until Cathedral has spent \$1,500,000 which will be through 1990. Ecstall will have to fund 100% of the 1991 exploration expenditures until it has paid its 40% share of total costs including those in 1989 and 1990. The Bronson property is along the east side of Skyline's producing Johnny Mtn. gold mine. The 10,250-acre Pelican property is 6 miles southeast of Bronson Creek.

WESTERN CANADA

ECSTALL MINING CORPORATION (EAM-V)

CONTINUED FROM PAGE ONE - In 1989, an \$800,000 program  
was focused on the S and T

zones on the east side of Bronson Creek where trenches  
assayed 0.51 oz.gold/t. Cathedral and two Imperial  
Metals Corp. group Limited Partnerships, Geomex 2 and  
Geomex 10, have acquired from Western Canadian Mining  
the option to earn a 60% interest, net 30% to Cathedral,  
in the properties for option payments totalling  
\$205,000, exploration expenditures of \$400,000 by  
Dec.31, 1990 and a 5% net profit interest to the  
vendor. On the S zone, 16 holes have tested a  
1,000-foot strike length which is open along strike and  
to depth. See table of assays below:

S ZONE EXTENDED PROGRAM

HOLE NO.	AZIMUTH DEGREES	DIP DEG.	DEPTH FEET	INTERVAL FEET	LENGTH FEET	GOLD OZ/T
13	050	-45	328	117.1 - 121.7	4.6	0.126
14	050	-60	298	236.9 - 239.2	2.3	.037
15	050	-45	447	177.8 - 182.6	4.8	.241
16	050	-60	541	264.1 - 277.6	13.5	.116
17	050	-45	507	189.3 - 196.9	7.6	.178
18	050	-60	500	253.3 - 266.4	13.1	.310
and				278.5 - 280.5	2.0	.604
21	050	-45	547	35.8 - 38.1	2.3	.154
22	050	-60	475	336.0 - 337.9	1.9	.023
23	050	-45	450	432.1 - 439.3	8.0	.125
24	050	-60	767	155.2 - 161.7	6.5	.087
25	050	-50	837	485.6 - 490.2	4.6	.965
