## GULF INTERNATIONAL MINERALS LTD. (GIM-V)

EXPLORATION PLANS - Dr. Gerald G. Carlson, P.Eng.,  
president, reports Gulf

International Minerals Ltd. will begin its 1990  
exploration program on the 100%-owned McLymont property  
located about 100 km NW of Stewart, B.C. on 15Jun90.  
This first phase program, budgeted at \$500,000, will  
include a minimum 10,000 feet of diamond drilling.

The first hole will parallel hole 87-29 to confirm  
the earlier result of 36.5 feet grading 1.605  
oz.gold/ton. SEE CROSS-SECTION OVERLEAF. Drilling to  
the north will test extensions from hole 89-64, which  
contained visible gold and averaged 0.309 oz.gold/ton  
over 12.8 feet. A potentially new, parallel zone to the  
northwest encountered in hole 89-66 with 1.14  
oz.gold/ton over 2.0 feet will also be tested.

This program will be followed by an underground  
examination of the northwest zone and a comprehensive  
surface exploration program over the rest of the  
property. (SEE GCNL No.48, 8Mar90, P.1 FOR RELATED DATA)
