WESTERN CANADIA

SUNTAC MINERALS CORP. (SUJ-V)

HOLE NO.	INTERSECTION FEET	LENGTH FEET	GOLD OZ/T	'POLARIS TAKU ASSAYS
PC90-5	621.5 - 626.5	5.0	0.553	' Murray Pezim, director, reports
PC90-6	805.2 - 809.2	4.0	.146	' Suntac Minerals Corp. has received
	857.5 - 858.5	1.0	.106	' fire assay results
	1104.2 - 1124.1	19.9	.145	' from the 60%

optioned Polaris Taku project located in NW B.C. about 40 miles east of Juneau, Alaska. (SEE GCNL No. 39, 23Feb90, P.1 FOR PREVIOUS RESULTS) Both drills have completed 10 holes totalling about 9,700 feet on the C Vein system in 1990. Two of the holes were abandoned before reaching target depth. Assays for holes PC90-7 and 8 are pending which completes the planned budget of

\$600,000 for this phase of drilling. Suntac has an option from REMBRANDT GOLD MINES LTD. (RTG-ALBERTA).
