NO.94(1990)
MAY 15, 1990

Reliable

ADRIAN RESOURCES LTD., (ADL-V)

NEW PRECIOUS METALS ZONE - Lawrence Page, president,
reports Adrian Resources Ltd.
has been advised by PRIME RESOURCES GROUP INC., (PRU-V)
of a new precious metals discovery called the 21C Zone
at Eskay Creek which is projected to pass through the
Tok Claim Gap held by Adrian and EURUS RESOURCE CORP.,
(ERR-V). See story above for details. The eastern
portion of the Tok claim gap occurs within the Iks 1
claim of Adrian's Ski project and covers a portion of
the 21B Zone deposit. Reserves within the Tok claim gap
on the Iks 1 claim, as calculated by Roscoe Postle and
Associates, total 65,000 tons averaging 0.92 oz. gold
ton, 57.4 oz.silver/ton, 1.1% lead and 2.2% zinc at a
cut-off grade of 0.25 oz.gold/ton.

There is a Section 35 complaint against the Gamma
claim on the west side of the Tok claim gap. Two
appeals are in progress concerning other claims staked
over the Tok claim gap which are as yet unresolved.
Should the complaint be struck down, Adrian would
maintain its present share of the Tok claim gap; should
the Gamma claim be cancelled, Adrian would control the
entirety of the Tok claim gap. (SEE GCNL No.80,
25Apr90, P.1 FOR RELATED INFORMATION)
