DIAMOND DRILL HOLE ASSAY RESULTS

HOLE	COORDINATE	DIP	WIDTH	OZ. GOLD/T	
D90-2	1974N- 2983E	-65°	11.4 ft	0.020	' Dagoon and
D90-3	1974N- 2983E	-50°	9.5 uncut.	.183	' Greenstone
			9.5 cut	.146	' each as to
D90-4	1991N- 2977E	-45°	3.6	.033	' 50% have
D90-5	" "	-65°	8.8	.172	' reported new
			6.2	.253	' trench and
			3.6	.434	' diamond drill
D90-6	2082N- 2995E	-45°	3.9	.154	' hole assays
			2.3	.255	' from the
					' David and
					' Lew property
D90-1	1974N- 2983E	-45°	18.5 uncut.	.285	' located 30
					' km southwest
					' of Cranbrook

TRENCH SAMPLES	ASSAY	LENGTH FT.	OZ. GOLD/T	
1960N		11.1	0.47	' B.C. The
1975N		6.5	.20	' trenches
1985N		9.2	.12	' have now
1995N		5.0	.45	' opened a
2000N		6.5	.1	' north/south
2075N		3.3	.35	' strike length
2010N		3.3	.43	' of 1,600 m
2020N		8.2	.12	' in a silicif
2125N		3.8	.44	' -led shear
				' zone in the
1120N	grab	3.3	0.02	' Aldridge for
1200N	grab	3.3	.02	' -mation. All
1440N	Main zone	10.2	.02	' the drill
	East zone	6.2	.38	' holes are
1540N	Main zone	6.5	.117	' across the
	East zone	3.6	.09	' width of the
1550N	Main zone	17.1	.03	' structure,
	East zone not sampled			' normal to
1600N	Main zone	12.6	.03	' the strike.
1800N	Main zone	3.3	.04	' Drilling is
				' continuing.

Free gold was discovered by prospecting with a 5 km gold/lead anomaly located by close-spaced soil sampling prior to the start of trenching. The trenching has uncovered parallel structures. Trenching of the Main zone indicate widths from 3.5 meters to 22 meters. Channel sampling in the trenches is continuing as weather conditions permit. Results are awaited from trench samples now in for assay. The property now includes 20,000 acres. (SEE GCNL No.215, 6Nov90, P.1 FOR PREVIOUS INFORMATION)
