NINA DRILL RESULTS - Rick Levitt, director, reports Daren Resources Ltd., 60%, and Equinox Resources Ltd., 40%, have completed a 14 hole program on the Nina zinc/germanium property, 20 km north of Germansen Landing, B.C. Equinox is operator.

Drilling was designed at cut down-dip extensions to lead and zinc opened in trenching by Cominco Ltd. in the 1970's and found to contain exceptional concentrations of germanium. Germanium is a specialized metal used in the electronic and glass industries and sells for \$375/kg. See table above. Mineralization encountered was in pods and lenses near surface. Further drilling has been recommended. On 19Sep90, Daren shares were called for trading on Vancouver Stock Exchange. (SEE GCNL NO.183, 21Sep90, P.5 FOR MORE DETAILS)
