**PRESTON RESOURCE CORP. (PRQ-V)**

ROB PROGRAM COMPLETED - Patrick W. McCleery, president, reports Preston Resource Corp. has completed its \$250,000 exploration on the 50% owned 48 unit Rob claims which border the Cominco/Prime SNIP property about 100 miles northwest of Stewart, B.C. Previous work returned significant gold, silver and base metal values. This year's work comprised additional surface exploration including follow-up prospecting and soil, rock and channel sampling of targets along a 7 km limestone/volcanic contact. The 1990 work identified two priority gold/silver/base metal targets for drilling. Both targets were over 1,000 feet long and 100 feet wide and contained vein systems which returned values as high as 0.87 oz.gold/ton, 10.1 oz.silver/ton, 7.7% zinc, 2.9% copper and 3.9% lead. Based on this work, a 3,500-foot diamond drilling program has been proposed for the spring of 1991.
