BETTER RESOURCES LTD. (BRZ-V)

DRILLING COMPLETED - Dennis Baxter, director, reports Better Resources Ltd. has completed a six-hole, 933-foot drill program on its 100%-owned Mt. Washington gold/copper property on Vancouver Island, B.C. One hole on the same section where a previous hole cut 23 feet of 0.13 oz.gold/ton intersected 39.2 feet grading 0.044 oz.gold/ton, 0.58 oz.silver/ton and 0.95% copper. The other holes cut barren to weakly mineralized porphyry sills within Comox sediments. A four to six-hole drilling program is planned for the Murex area where a previous hole intersected 4.0 meters, or 13.1 feet, grading 0.184 oz.gold/ton and 4.08% copper. A comprehensive geological report will be prepared shortly on Better's copper property at Merritt, B.C. adjacent to the Craigmont mine. Joint venture partners are being sought.
