MENIKA MINING LTD. (MML-V)

On the 100%-owned Reliance property at Goldbridge, B.C., Menika has drilled 65 diamond drill holes on the Imperial showing which outlined proven and indicated reserves of 500,000 tons averaging 0.179 oz.gold/ton. Gold values increased with depth. Nine other gold showings have been exposed by road cuts on the two parallel shear zones on the west side of the property. A summary of exploration results follows. The Treasure shear zone is 2,000 feet long with four gold showings: The First Switchback returned assays up to 0.3 oz. gold /ton. The Bona zone returned 2.11 oz.gold/ton across 19.5 feet. The Treasure zone returned 0.239 oz.gold/ton across 4.5 feet. The Vista zone returned 66 feet averaging 0.256 oz.gold/ton in a road cut. The Royal shear zone is 2,300 feet long with six gold showings. The Diplomat zone returned 40 feet of gossan exposed by road averaging 0.2 oz.gold/ton. The Senator zone returned 0.4 oz.gold/ton over 190 feet. The Merit zone returned 0.139 oz.gold/ton over 9.0 feet. The Crown zone yielded up to 1.1 oz.gold/ton. The Eagle zone, the most southerly showing, returned 93 feet of gossan averaging 0.186 oz.gold/ton. At the Mint shear zone, a small zone on the west side of the property, drilling encountered 50 feet grading 0.112 oz.gold/ton. It is Menika's intention to option the property to a major gold company and retain an interest. (SEE GCNL No.188, 28Sep90, P.6 FOR OTHER PROJECT DETAILS)
