Reliable

BIG M RESOURCES LTD. (BIM-V)

(formerly Big M Petroleum Inc.)

LOCATION	WIDTH METERS	GOLD OZ/T	NEW GOLD DISCOVERY
Upper Trench	4.4	0.156	Ronald Netolitzky, director, reports Big M Resources Ltd. has <u>made a new discovery,</u> <u>the Coopers showing on</u> <u>the Waratah property</u> <u>located in the Iskut</u> <u>River area about 70</u> <u>miles northwest of</u> <u>Stewart, B.C. Big M</u> can earn a 50% working interest from <u>ROYAL</u> <u>BAY GOLD CORP. (RBG-V)</u> by spending \$500,000 over three years. The discovery of the Cooper showing resulted from a follow-up of a weakly anomalous soil sample site that returned 76 parts per billion gold. Three trenches have exposed a silicified shear-vein over 75 meters. See table above for saw-cut channel and chip sampling results. The zone remains open along strike, along an overburden-covered linear depression. A grab sample taken 75 meters to the west along strike returned 0.496 oz.gold/ton. (SEE GCNL No.180, 18Sep90, P.7 FOR OTHER INFORMATION)
Including	1.0	.443	
Middle Trench:			
East Channel	3.0	.135	
Including	1.0	.279	
Centre Channel	3.0	.254	
Including	1.0	.443	
West Channel	1.45+	.580	
Lower Trench	2.5	.717	
Including	.5	3.033
