ISKUT GOLD CORP. (ISK-V)

TRENCHING RESULTS - Rudy Mitterer, president, reports
Iskut Gold Corp. has received
favourable results from a geochemical program conducted
on the Knip property in the Eskay Creek area, 70 miles
northwest of Stewart, B.C. Values up to 0.18 oz. gold/
ton and 98.02 oz. silver/ton confirm the high grade
nature of the Mineral Hill area, which was trenched by
TEUTON RESOURCES CORP. (TUO-V). Iskut Gold can earn a
100% interest from Teuton by paying \$175,000 and issuing
100,000 shares, subject to a 2.5% net smelter return
royalty. Iskut Gold was granted certain extensions for
the staged cash payments.
