SAMPLING RESULTS - Gary Kilpatrick, president, reports Yellowjack Resources Ltd. has recently completed a program of geological mapping, geochemical surveying and surface rock sampling on the Sumit-Ore Hill property located in the Sheep Creek gold camp near Salmo, B.C. The property has hosted a former mine which processed 1,205 tons grading 0.72 oz.gold/ton. Rock samples were taken over a strike length of 2,700 feet; see table above for assays. Drill targets were identified and drilling has now begun. (SEE GCNL No.98, 22May90, P.6 FOR OTHER PROJECT INFORMATION)
