REESE RIVER RESOURCE CORP. (RRV-V)

NEW GOLD DISCOVERY TO BE EXPLORED - Chris Sampson, P.Eng,
consultant to Reese

River Resources, has reported significant new gold discovery on the Duffy Lake area, 100 km north of Vancouver, B.C. The discovery contained visible and free gold within Bridge River greenstones, the same host rocks of the Bralorne-Pioneer deposits which produced more than 4,000,000 ounces of gold up to 1970. Reese River Resources has acquired a 100% interest in the Raven #1 property where the discovery occurred, and will initiate an exploration program. The property was acquired from Gary Polischuk for \$20,000 cash and 200,000 shares. Mr. Polischuk will retain a 2% net smelter royalty.

The company has terminated interest in all of its Nevada holdings.
