90-4	-90	7.6 - 73.0	65.4	.144	.007	.38%

SOUTH KEMESS DRILL RESULTS - Charles M. Raymond,
director, reports St.

Philips Resources Inc. has received additional assays from the diamond drilling program on the South Kemess property located in the southern Toodoggone area about 200 miles north of Smithers, B.C. The property is owned 75% by St. Philips and 25% by Stork Ventures with EI CONDOR RESOURCES LTD. (ECN-V) holding an option to earn a 60% interest. Five holes have each been completed to about 800 feet deep. Hole 90-2 is 120 meters southeast of hole 90-1 and hole 90-4 lies 300 meters east of hole 90-1. The average grade of the three holes received to date is 0.23% copper and 0.015 oz.gold/ton for a copper equivalent of 0.75%. This compares with an average in 440,000,000 at Mt. Milligan of 0.210% copper and 0.014 oz.gold/ton for a copper equivalent of 0.68%.

EI Condor also re-assayed two holes previously drilled; see table below:

HOLE NO.	DIP DEG	INTERVAL METERS	LENGTH METERS	COPPER %	GOLD OZ/T	COPPER %
84-2	-45	18.5 - 91.5	73.0	0.15	0.011	0.54
84-3	-50	6.6 - 78.2	71.6	.22	.016	.76

More assays are expected shortly. (SEE GCNL No.151, 7Aug90, P.3 FOR PREVIOUS RESULTS)
