KESTREL RESOURCES LTD. (KRZ-V)

DRILL RESULTS - Bob Twitchell, director, reports Clifton Star Resources Inc., 50%, and Kestrel Resources Ltd., 50%, have received results from the remaining seven of 13 holes drilled on the KRL claims in the Iskut River area about 100 km north of Stewart.

B.C. The only significant intersection found was in hole KRL 90-11 between 269 and 270 feet that assayed 1.186 oz.gold/ton.

Initial results have been received on the first hole drilled on the Stu claims, also, a 50/50 joint venture with Kestrel as operator, located adjacent to the Johnny Mountain gold mine in the Iskut River area. The core was tested for gold, silver, copper; however, no significant results were detected. Results from the two remaining holes are expected shortly. (SEE GCNL No.173, 7Sep90, P.2 FOR PREVIOUS RESULTS)
