CALDERA RESOURCES LTD. (KDA-V)

MARSHALL CREEK STATUS REPORT - Thomas Crosby, director,
reports on exploration
activities at the Silver Stream claims on the Marshall
Creek property 60 km west of Lillooet, B.C. Caldera can
earn a 100% interest by paying \$75,000 and issuing
200,000 shares. The initial work tested the Detail area
2, an anomalous gold zone indicated by an earlier soil
sampling program. Trenching across a portion of the
zone exposed mineralized bedrock along 75 meters and a
135 meter trench and channel samples were taken in three
meter sections. Assays ranged up to 1930 parts per
billion gold and 10.5 parts per million silver. More
trenching is planned to define the zone.

Caldera has terminated negotiations with Combined
Water Technologies Inc. (SEE GCNL No.2, 3Jan91, P.2 FOR
PREVIOUS INFORMATION)
