CALDERA RESOURCES LTD. (KDA-V)

EXPLORATION PLANNED - E.N.Ascroft, director, reports Caldera Resources Ltd. plans to start a continuation of the exploration program on the Silverstream claims of the Marshall Creek property the first week of May. The property is about 60 km west of Lillooet, B.C., where the company can earn a 100% interest by paying \$75,000 and issuing 200,000 shares.

The initial work carried out in 1989 successfully tested an anomalous zone by a soil sampling program. In the fall of 1990, a program of trenching across a portion of the zone exposed mineralized bedrock along 75 meters of a 135-meter trench which was channel sampled in three-meter sections. Resulting assays ranged up to 1,930 parts per billion gold and 10.5 parts per million silver. The 1991 program will consist of additional trenching concentrated on the anomalous area to expand and further define the mineralized zone to prepare for potential diamond drill locations.
