HOLE NO.	TRUE WIDTH FEET	GOLD OZ/T	DAVID/LEW CLAIMS DRILL RESULTS
90-38	2.0	0.09	Walter J. Clemens, director, reports Dragoon Resources Ltd.
90-39	19.0	.55	and 50/50 joint venture partner
90-53	25.9	.26	Greenstone Resources Ltd. have
90-54	3.3	.05	received further assays from
90-55	11.8	.12	their drilling program on the
90-56	4.0	.21	David/Lew claims located 18

-----' miles west of Cranbrook, B.C.

(SEE GCNL No.225, 21Nov90, overleaf P.1 for map) Six drill holes in the Main zone returned significant gold values; see table above. Hole 90-39 returned a 19-foot intersection grading 0.55 oz.gold/ton. This hole was deepened to hit the zone at a similar depth to hole 90-43 which assayed 0.37 oz.gold/ton over 36 feet. Hole 90-53 assayed 0.26 oz.gold/ton over 26 feet. In total, assays from 21 Main zone holes have now been received and all contain significant gold values. The best widths and grades were from the deepest intersections. Further results are expected shortly from drilling of a parallel structure. (SEE GCNL No.28, 8Feb91, P.1 FOR PREVIOUS DRILL RESULTS)
