FINAL MILA DRILL RESULTS - Project manager Goldbank

Ventures Ltd. has received the final drill results from Phase I drilling of the Mila project at Vavenby, B.C. International Suneva Resources Ltd. has earned into a 50/50 joint venture with Goldbank by spending \$250,000 on exploration as of 12Jan91. Adrian Resources Ltd., which is funding the project, is earning a 70% interest by spending \$1,500,000 on exploration and delivering a positive feasibility study within five years. A total of 1,800 meters in nine holes was drilled. The best hole was M90-2 which returned 11.28 meters grading 0.34% copper and included 6.57 feet grading 0.46% copper.

The stratigraphic package has now been demonstrated by the drilling to extend over six km of strike length with minor disruption from faulting. (SEE GCNL No.33, 15Feb91, P.2 FOR MORE DETAILS)
