WORTHINGTON RESOURCES CORP. (WRC-V)

DRILLING RESUMED - Greg Amor, president, reports
Worthington Resources Corp. has
resumed drilling on the Southeastern property located on
the southeast corner of Graham Island, one of the Queen
Charlotte Islands off the northwest coast of B.C. some
750 km northwest of Vancouver. The company can earn a
100% interest by making staged payments totalling
\$280,000, subject to a 3% net smelter return royalty.

Exploration to date has included geological and
geophysical surface work and the completion of 18
diamond drill holes. The work showed the geology has
potential to host an epithermal gold deposit. Holes
90-11 returned 0.48 oz.gold/ton over 9.0 feet, hole
90-12 returned 0.31 oz.gold/ton over 20 feet and hole
90-18 returned 2.3 oz.gold/ton over 5.0 feet. All the
holes were in the southern zone. The property was a
former producer which yielded 41 oz. gold, 27 oz.
silver, 259 lbs. copper and 665 lbs. lead from 505 tons
of ore.

The next phase of drilling will include holes to
test the Northern showing, a 10-foot wide vein that has
been traced for 43 feet by trenching. The grade and
continuity of the Southern zone will also be tested.
