LARAMIDE RESOURCES LTD. (LAM-V)

THREE EXPLORATION PROJECTS REVIEWED - Albert F. Reeve,  
president, Laramide  
Resources has provided an update on three projects. In  
the 1990 fourth quarter 23 drill holes totalling 5,744  
meters were completed on the Lara property 30 km west of

Duncan, Vancouver Island, B.C. The objective was to  
explore a newly indentified massive sulphide horizon and  
to increase the existing drill indicated gold/base metal  
resource of 583,000 tons averaging 1.01% copper, 1.22%  
lead, 5.87% zinc, 2.92 oz.silver/ton and 0.138 oz. gold/  
ton. The new mineralized zone, called the 262, was  
confirmed along strike for about four km; however, no  
ore class intersections were returned. Laramide has a  
100% interest in the Lara property, subject to a 10% net  
profits interest to Abermin Corp. convertible, at  
Abermin's option, into 5% of Laramide's issued shares,  
which equals 544,259 shares.
