NORTHAIR MINES LTD. (NRM-T)

JOINT VENTURE SIGNED - Donald A. McLeod, president, reports Northair Mines Ltd. has agreed to earn a 50% interest from Ottarasko Mines Ltd. in a high grade gold property located about 100 miles southwest of Williams Lake, B.C. Northair paid \$10,000, issued 25,000 shares and will complete \$100,000 of exploration by 1Dec91. Northair may pay a further \$35,000, issue a further 75,000 shares and spend a total of \$2,000,000 on exploration by 1Dec95, to earn. Under certain circumstances, Northair has an option to earn a 50% interest in the surrounding area.

The property is road accessible with electrical power nearby. During initial prospecting, a diorite hosted, fault-controlled, quartz vein system was discovered assaying 0.913 oz.gold/ton over 1.2 feet. Subsequent hand excavation in six trenches exposed the vein system over 360 feet of strike length with an average grade of 0.787 oz.gold/ton over an average width of 3.0 feet. The full width of the vein system has not been exposed. Widths of up to 4.6 feet assayed 1.690 oz.gold/ton, within the diorite host, assays as high as 0.120 oz.gold/ton over 3.3 feet have been encountered.

Northair plans an exploration program to start in April including trenching, mapping and sampling with selected geophysics. Drilling is expected to follow. (SEE GCNL No.241, 13Dec90, P.3 FOR OTHER PROJECT DATA)
