CASSIAR GOLD PROJECT UPDATE - Guilford H. Brett,
president, Cusac

Industries Ltd., reports drilling continues to expand reserve potential on the Bain vein at the Cassiar gold project located at Table Mountain on the 30% net profits interest located nine km southeast of Cassiar, B.C. The program is being carried out by TOTAL ENERGOLD CORPORATION (TGD-T; TGDGF-Nasdaq). A total of 16,247 feet of drilling has been completed on this structure, which now has an indicated strike length of 700 meters. Assays from hole C90-342, which intersected two zones, returned 1.499 oz.gold/ton over 0.2 meters and 0.012 oz.gold/ton over 2.3 meters. C90-343 returned 0.025 oz.gold/ton over 0.7 meters. More assays are pending. Definition drilling has begun on the previously established western portion of the vein. Drilling continues to the east.
